

Betta Fish

Betta facts and tips and origin

Betta Fish originate from **Asia**. And are called siamese fighting fish, known for being highly territorial and aggressive towards newcomers to the tank which is why its only one betta per a tank, If you want more than one then you will need separate tanks that's blocked so they won't see each other and will not stress each other out.

Types Of Betta Fish, and the do's and don't

As George Elliot says "Animals are such agreeable friends, They ask no questions, and pass no criticisms"

Betta fish comes in many *different colors*. From multi-colored betta fish to single colored fish and ranges in different sizes from the regular betta to the giant and king betta ranging from **3 to 7 inches in length** and from my own experience with my halfmoon king betta, betta fish are smarter than your regular pet fish and can be taught many tricks and can be entertained with toys but even though its tempting mirrors are not ideal as it can cause the male betta fish to flare and eventually stress it out which can be a bad thing for your betta if done too much.

Another thing that is bad for your new betta fish is plastic plants, even though you may think that the type of plant does not matter, betta fins are very delicate and the plastic can break their fins easily. As they like to hide and play inside of it, if you don't like real plants for the aquarium than buying soft thread and silk plants is the best option then the plastic aquarium plants if you are unsure if the plant is right for a betta fish then buying specialty made plants from the petstore or online made for betta fish is also a good option for you.
